

INDRA KUMAR V

Avinashi, Tamil Nadu, India

indrakumar.4102@gmail.com — +91 99657 16838 — LinkedIn — GitHub

PROFESSIONAL SUMMARY

Computer Science Engineering (Cyber Security) undergraduate with strong fundamentals in **Data Structures, Algorithms, Object-Oriented Programming, and Software Design**. Hands-on experience building **back-end systems, automated monitoring tools, and data ingestion pipelines** using Python, Java, Flask, and SQL. Interested in Software Engineer Intern roles focused on scalable data platforms, system monitoring, and infrastructure engineering.

EDUCATION

Dr. N.G.P. Institute of Technology	2023 – 2027
B.E. Computer Science and Engineering (Cyber Security)	CGPA: 7.91

Cambridge Matriculation Hr. Sec. School, Cheyur
HSC: 87% — SSLC: 89.4%

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL

Core Computer Science: Data Structures & Algorithms, OOPS, Software Design, Time & Space Complexity

Backend & Data Technologies: Flask, MySQL, REST APIs, Data Ingestion & Enrichment, Monitoring Pipelines

Tools & Platforms: Linux (Parrot OS), Git, GitHub, VS Code

INTERNSHIP EXPERIENCE

Cybersecurity Intern — Hackup Technology	15 Days
---	---------

- Executed vulnerability assessments across multiple test web applications using OWASP Top 10 attack scenarios
- Analyzed live network traffic packets using Wireshark to identify abnormal request patterns
- Documented findings and attack simulations, improving understanding of secure application behavior

Cyber Crime Internship — Tamil Nadu Cyber Crime Wing	45 Days
---	---------

- Engineered **FundTrail Analysis Tool**, a Flask-based backend system with MySQL to manage and analyze financial fraud cases
- Constructed 4+ functional modules including complaint tracking, officer management, analytics dashboards, and fund-flow visualization
- Processed structured transaction datasets to support real-world cybercrime investigations

PROJECTS

DNS Record Finder for Bug Bounty

- Architected a Python-based reconnaissance tool to collect and normalize DNS records (A, MX, TXT, CNAME)
- Performed backend technology fingerprinting using DNS analysis and WhatWeb
- Structured extracted metadata to support security assessment and version-based vulnerability analysis

PortGuardian — Port Watch & Alert Automation Tool

- Built a Python-based monitoring system to continuously scan system ports for unauthorized changes
- Logged timestamped port-state data to maintain historical records for audit and analysis
- Triggered automated alerts to simulate real-world infrastructure observability workflows

Tamper Trace — Web Integrity Monitoring System (College Mini Project — Ongoing)

- Structured a proactive web integrity monitoring system using baseline content snapshots
- Applied cryptographic hashing (Python hashlib) to detect unauthorized file-level changes
- Generated real-time alerts to reduce response time during defacement incidents

FundTrail — Financial Transaction Analysis Tool

- Engineered a Flask-MySQL backend system consisting of 4 core modules: complaint intake, officer management, analytics dashboard, and fund-flow visualization
- Processed structured financial transaction records to trace multi-layered fund transfers during investigations
- Enabled case-level analysis by organizing transaction data into searchable and analyzable formats

HACKATHONS

Smart India Hackathon (SIH) 2024 — Drones & Technology Track

Collaborated in a team to design technology-driven solutions under real-world constraints.

Pentathon 2025 — Cybersecurity Hackathon

Solved real-world security challenges through analytical thinking and rapid prototyping.

CERTIFICATIONS & WORKSHOPS

Academic & Online Certifications

- NPTEL — Privacy and Security in Online Social Media
- NPTEL — Practical Cyber Security for Cyber Security Practitioners

Research & Conferences

- International Conference Paper Presentation — *Ransomware Attack on Healthcare Organizations: Survey of Incidence and Impact*

Workshops & Professional Training

- DRDO Sponsored Workshop — Cyber Threat Detection Using Deep Learning
- CSIR Sponsored Seminar — In-Vehicle Intrusion Detection Systems & Security Challenges
- Certified Cybersecurity Educator Professional (CCEP)

LANGUAGES

English (Professional) — Tamil (Native) — Hindi (Basic)

SOFT SKILLS

Problem Solving — Team Collaboration — Communication — Critical Thinking — Time Management
